

Interested in Sustainable Forest Management?

Here's your chance to get involved.

Participating Forest Companies and Government Agencies in the Okanagan and Thompson areas of BC have elected to become certified under the Canadian Standards Association (CSA) – Sustainable Forest Management (SFM) certification program.

Central to the achievement of “Certified” status is the active solicitation and consideration of the input of a representative cross-section of groups and individuals having interests in forest management. Participants may or may not formally represent a group or organization. Typical participants include, Ranchers, Trappers, Hiking and Outdoor clubs, Snowmobile Clubs, Civic and Regional resource purveyors, Environmental and Conservation Organizations, Education groups, and just plain folk.

Participation is voluntary and typically involves two meetings and one field trip each year. Lunch and reasonable travel costs are covered for participants.

If you still interested in participating in either the Kamloops or Okanagan Public Advisory Groups, please go to the “Contact us” tab on either home page and contact the facilitator via the e-mail link.
